**iCOSLIVE**

## Online transport and logistics management solution offering real time 24/7 track and trace through to proof of delivery

iCOS LIVE is transforming the transport and logistics industry by giving operators back control, transparency, plugging revenue leakage and reducing resources by taking them from a paper based world to a paperless world.

Transport operators customers can send job bookings online or electronically via EDI. Jobs are received by dispatch and passed onto the vehicle to the iCOS GO Android mobile app for real time updates including proof of delivery.

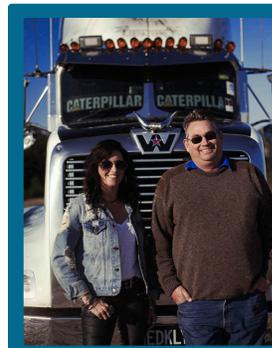

The iCOS management system can be integrated with XERO, MYOB and other online accounting systems for a seamless paperless solution.

Navman Wireless has partnered with iCOS to offer a complete end-to-end freight and GPS vehicle tracking solution. Navman Wireless provides the location of a vehicle and iCOS delivers the information on its freight.

### iCOS Features and Benefits

- Caters for general freight, ambient, chilled or frozen; container management and movement including import, export and empty moves and bulk haulage, sand and metal loads
- Paperless solution, available 24/7, anywhere, anytime
- Electronic proof of delivery
- Auto-dockets the job to not lose one-plugging revenue leakage

- Date and time stamps for all movements, transaction updates in real time including signature capture
- Streamlines and gives total transparency and control to run the business
- Schedules in job order enabling the dispatcher to control pick-up and delivery
- Customers self-service to manage accounts and job bookings online or electronically increasing accuracy and efficiency
- Dropbox storage for documents and consignment notes
- Pro-rata reporting kilometres travelled vs moves in conjunction with Navman Wireless

"Since installing the Navman Wireless/iCOS LIVE management systems our business has grown by 35%. Two years ago we were struggling to complete 20 to 30 jobs a day, while now we are consistently delivering between 55 and 80 jobs per day."

Andrew McSweeney  
Owner, Scuzztrans Transport
